About Me

My name is Mohammed and I am 21 years old. I embarked on a programming journey in 2020. I gained experience as a designer for one year and then moved to work as a front-end developer for two years. At this juncture, I am actively seeking a fulfilling role as a Front End Developer, with a specialization in ReactJS.

Project

In my portfolio, I proudly present dynamic projects: three dashboards, an innovative e-commerce platform, and ten captivating landing pages. These creations boast versatile features like eye-catching subtitles, seamless dark mode integration, and flexible resizableability. My animation finesse shines through my expertise in SVG. Leveraging Next.js, I employ cutting-edge strategies for peak website performance, including optimized image rendering. My track record reflects a commitment to delivering top-tier web experiences, blending creativity, technical finesse, and a deep grasp of modern design trends
